## Endumeni Local Municipality ANNUAL FINANCIAL STATEMENTS

for the year ended 30 June 2020

#### Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board. The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and places considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit. The accounting officer has reviewed the municipality's cash flow forecast for the year to June 30, 2020 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future. These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months. The municipality however faces challenges of debtor non-payment and the high rate of electricity losses due to theft.

I am responsible for the preparation of these annual financial statements, which are set out on pages 5 to 61, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors, as disclosed in note 24 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

Accounting Officer: Mr SD Mbhele

31 October 2020

## Endumeni Local Municipality ANNUAL FINANCIAL STATEMENTS

## Endumeni Municipality SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES as at 30 June 2020

#### ACCOUNTING POLICIES

#### 1 BASIS OF ACCOUNTING

#### **BASIS OF PRESENTATION**

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise.

These annual financial statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP), as approved by the Minister of Finance, including any interpretations, guidelines and directives issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's financial statements, unless explicitly stated. The details of any changes in accounting policies are explained in the relevant policy.

#### PRESENTATION CURRENCY

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

#### GOING CONCERN ASSUMPTION

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months. The municipality however faces challenges of debtor non-payment for municipal services and a high rate of electricity losses due to theft. This may have future implications on the operations of the municipality. The ratio analysis indicate a decline in the liquidity ratios. Current Ratio being 1.24 (1.31 - 2019) and Acid test ratio of 1.13 (1.19 - 2019). The total liabilities as at 30 June 2020 amounted to R123 168 331, whilst the estimated total cash and cash equivalents, equitable share and estimated receipts amounted to R337 778 365.

#### COMPARATIVE INFORMATION

Budget information in accordance with GRAP 1 and 24, has been provided to these financial statements and forms part of the annual financial statements.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

#### 1.1 SIGNIFICANT JUDGEMENT AND SOURCES OF ESTIMATION UNCERTAINTY

In preparing the financial statements, management is required to make estimates and assumptions that affect the amount represented in the financial statements and related disclosures. Use of available information and application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the financial statements. Significant judgements include:

#### 1.1.1 PROVISIONS

Management determined an estimate for provisions raised based on the information available. Additional disclosure of these estimates are included in Note 13 Current and Non- current provisions

#### 1.1.2 USEFUL LIVES OF PROPERTY PLANT EQUIPMENT AND INTANGIBLE ASSETS

The municipality depreciates/amortises its property, plant and equipment and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful lives, which is determined when the asset become available for use. The useful lives and residual values are based on industry knowledge and are reviewed annually.

#### 1.1.3 DEFINED BENEFIT PLAN LIABILITIES

The municipality obtains acturial valuations of its defined benefit plan liabilities. The defined benefit obligations of the municipality that were identified are post retirement medical benefit obligations and long service awards. The estimated liabilities are recorded in accordance with the requirements of GRAP 25. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in Note 41 to the financial statements.

#### 1.1.4 REVENUE RECOGNITION

Management considered the detailed criteria for the recogmition of revenue as set out in GRAP 9 Revenue from Exchange Transactions and GRAP 23 Revenue from Non Exchange Transactions and in particular, whether the service has been rendered. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

#### 1.1.5 FINANCIAL ASSETS AND LIABILITIES

The classification of financial assets and liabilities into categories is based on relevant accounting standards as assessed by management.

#### 1.2 STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE

The following Standards of GRAP and interpretations of Standards of GRAP approved have been issued but are not yet effective and have not been early adopted by the municipality:

GRAP 34 - Separate Financial Statements

GRAP 35 - Consolidated Financial Statements

GRAP 36 - Investments in Associates and Joint Ventures

**GRAP 37 - Joint Arrangements** 

GRAP 38 - Disclosure of Interests in Other Entities

GRAP 110 - Living and Non-living Resources

Management have considered all of the above-mentioned GRAP standards approved or issued but not yet effective and anticipates that the adoption of these standards will not have a significant impact on the financial position, financial performance or cash flows of the municipality. The municipality does not have entities within its control and does not anticipate to enter into Investment in associate, joint venture or arrangements for joint control. The municipality does not anticipate that the standard on living and non-living resources will become part of its mandate.

#### 1.3 PROPERTY, PLANT AND EQUIPMENT

#### **INITIAL RECOGNITION**

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. Items of property, plant and equipment are initially recognised as assets when:

- it is probable that future economic benefits or service potential associated with the item will flow to the entity; and
- the cost of the item can be measured reliably.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

#### **INITIAL MEASUREMENT**

Items of property, plant and equipment are initially measured at cost at the acquisition date.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

#### SUBSEQUENT EXPENDITURE

Where the entity replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component.

Subsequent expenditure including major spare parts and servicing equipment qualify as property, plant and equipment if the recognition criteria are met.

#### SUBSEQUENT MEASUREMENT

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

#### **DEPRECIATION**

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. The depreciable amount is determined after taking into account an assets' residual value, where applicable. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

| Infrastructure   |               | Other                   |              |
|------------------|---------------|-------------------------|--------------|
| Roads and Paving | 3 - 100 years | Machinery and equipment | 3 - 20 years |
| Electricity      | 3 - 80 years  | Furniture and Equipment | 3 - 50 years |
| Water            | 5 - 100 years | Motor Vehicles          | 4 - 20 years |
| Sewerage         | 10 - 60 years | Buildings               | 5 - 30 years |
| Other            | 10 - 30 years | -                       | -            |

At each reporting date the municipality will assess whether there has been an indication that the expectation of the remaining useful lives of assets have changed. Such reviews are completed on Infrastructure, movable, intangible and leased assets. Any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

#### **DERECOGNITION**

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

#### 1.4 HERITAGE ASSETS

#### **INITIAL RECOGNITION**

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

A heritage asset shall be recognised as an asset if, and only if:

- (a) it is probable that future economic benefits or service potential associated with the asset will flow to the entity, and
- (b) the cost or fair value of the asset can be measured reliably.

#### **INITIAL MEASUREMENT**

An asset that has met the recognition requirement criteria for heritage assets shall be measured at its cost if such an asset has been acquired through an exchange transaction.

Where a heritage asset has been acquired through a non-exchange transaction, its cost shall be measured at its fair value as at the date of acquisition.

#### SUBSEQUENT MEASUREMENT

Heritage assets are not depreciated based on their nature however the municipality assesses at each reporting date whether there is a need for impairment.

The class of heritage assets are carried at its cost less any accumulated impairment losses.

#### DERECOGNITION

The carrying amount of a heritage asset is derecognised:

- (a) on disposal, or
- (b) when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset shall be determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

#### 1.5 INTANGIBLE ASSETS

An intangible asset is an identifiable non-monetary asset without physical substance. An asset is identifiable if it either:

- is separable, ie. capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

#### **INITIAL RECOGNITION**

Examples include computer software, licences, and development costs. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitlised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the municipality intends to complete the intangible asset for use or sale;
- it is technically feasible to complete the intangible asset;
- the municipality has the resources to complete the project; and
- it is probable that the municipality will receive future economic benefits or service potential; the municipality has the ability to measure reliably the expenditure during development.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

#### SUBEQUENT MEASUREMENT

Intangible assets are subsequently carried at cost less accumulated amoritisation and impairments. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

#### **AMORTISATION**

Amortisation is charged so as to write off the cost or valuation of intangible assets over their estimated useful lives using the straight line method. The annual amortisation rates are based on the following estimated average asset lives:

Computer software

2 - 5 years

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

#### IMPAIRMENT

The municipality tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

#### **DERECOGNITION**

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

#### 1.6 INVESTMENT PROPERTY

#### **INITIAL RECOGNITION**

Investment property includes property (land or a building, or part of a building, or both land or buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations.

Investment Property is initially recognised when future economic benefits or service potential are probable and the cost or fair value can be determined reliably.

At initial recognition, the municipality measures investment property at cost including transaction costs once it meets the definition of investment property. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition.

The cost of self-constructed investment property is the cost at date of completion.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property (property, plant and equipment), the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the entity accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

#### SUBSEQUENT MEASUREMENT

Investment property is subsequently measured at fair value model. The fair value of investment property is based on the valuation roll values of the local municipality in whose jurisdiction the investment property is situated. Fair value is adjusted when a new valuation roll is implemented by the local municipality for property tax purposes. A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

#### **DERECOGNITION**

Investment property is derecognised when there is a disposal or no future economic benefits or service potential are to be derived from the property.

All gains or losses, which result from the derecognition, are recognised in the Statement of Financial Performance.

#### 1.7 INVENTORIES

#### INITIAL RECOGNITION AND MEASUREMENT

Inventories comprise current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Where inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

#### SUBSEQUENT MEASUREMENT

Inventories, consisting of consumable stores, raw materials, work-in-progress and finished goods, are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down in this way. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The basis of determining cost is the weighted-average method.

#### **DERECOGNITION**

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

#### 1.8 FINANCIAL INSTRUMENTS

#### **INITIAL RECOGNITION**

The entity recognises a financial asset or a financial liability in its Statement of Financial Position when, and only when, the entity becomes a party to the contractual provisions of the instrument.

Upon initial recognition the entity classifies financial instruments or their component parts as a financial liabilities, financial assets or residual interests in conformity with the substance of the contractual arrangement and to the extent that the instrument satisfies the definitions of a financial liability, a financial asset or a residual interest.

#### **INITIAL MEASUREMENT**

When a financial instrument is recognised, the entity measures it initially at its fair value plus, in the case of a financial asset or a financial liability not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

#### SUBSEQUENT MEASUREMENT

Subsequent to initial recognition, financial assets and financial liabilities are measured at fair value, amortised cost or cost.

All financial assets and financial liabilities are measured after initial recognition using the following categories:

#### **INVESTMENTS AT AMORTISED COSTS**

Investments, which include fixed deposits and short-term deposits invested in registered commercial banks are categorised as financial instruments at amortised cost and are subsequently measured at amortised cost.

Where investments have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the Statement of Financial Performance.

#### **INVESTMENT AT FAIR VALUE**

Investments, which represent investments in residual interest for which fair value can be measured reliably, are subsequently measured at fair value.

Gains and losses in the fair value of such investments are recognised in the Statement of Financial Performance.

#### **INVESTMENT AT COST**

Investments at cost, which represent investments in residual interest for which there is no quoted market price and for which fair value cannot be measured reliably, are subsequently measured at cost.

#### TRADE AND OTHER RECEIVABLES

Trade and other receivables are initially recognised at fair value plus transaction costs that are directly attributable to the acquisition and subsequently stated at amortised cost, less provision for impairment. All trade and other receivables are assessed at least annually for possible impairment. Impairments of trade and other receivables are determined in accordance with the accounting policy for impairments. Impairment adjustments are made through the use of an allowance account.

Bad debts are written off in the year in which they are identified as irrecoverable. Amounts receivable within 12 months from the reporting date are classified as current. Interest is charged on overdue accounts.

#### TRADE PAYABLES AND BORROWINGS

Trade payables are initially measured at fair value plus transaction costs that are directly attributable to the acquisition and are subsequently measured at amortised cost using the effective interest rate method.

#### **CASH AND CASH EQUIVALENTS**

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash, that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities: other financial liabilities carried at amortised cost.

#### **IMPAIRMENT OF FINANCIAL ASSETS**

All financial assets measured at amortised cost, or cost, are subject to an impairment review. The entity assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

#### IMPAIRMENT FOR FINANCIAL ASSETS HELD AT AMORTISED COST

The entity first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant and individually or collectively for financial assets that are not individually significant. If the entity determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in the collective assessment of impairment.

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss shall be reversed either directly or by adjusting an allowance account. The reversal shall not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

#### IMPAIRMENT OF FINANCIAL ASSETS HELD AT COST

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

#### DERECOGNITION

A financial asset is derecognised only when:

- · the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset;
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer.

A financial liability is derecognised when the obligation is extinguished. Exchanges of debt instruments between a borrower and a lender are treated as the extinguishment of an existing liability and the recognition of a new financial liability. Where the terms of an existing financial liability are modified, it is also treated as the extinguishment of an existing liability and the recognition of a new liability.

#### 1.9 UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

#### 1.10 IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

#### 1.11 FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

#### 1.12 PROVISIONS

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made.

Provisions are reviewed at reporting date and adjusted to reflect the current best estimate. Where the effect is material, non-current provisions are discounted to their present value using a pre-tax discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability (for example in the case of obligations for the rehabilitation of land).

The municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

#### 1.13 BUDGET INFORMATION

The annual budget figures have been presented in accordance with the GRAP reporting framework. A separate statement of comparison of budget and actual amounts, which forms part of the annual financial statements has been prepared. The comparison of budget and actual amount will be presented on the same accounting basis, same classification basis and for the same entity and period as for the approved budget. The budget of the municipality is taken for a stakeholder consultative process and upon approval the approved budget is made publicly available

Material differences in terms of the basis, timing or entity have been disclosed in the notes to the annual financial statements

The most recent approved budget by Council is the final budget for the purpose of comparison with the actual amounts.

#### 1.14 LEASES

#### **MUNICIPALITY AS LESSEE**

#### RECOGNITION

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the entity through the lease agreement. Assets subject to finance leases are recognised in the Statement of Financial Position at the inception of the lease, as is the corresponding finance lease liability.

Assets subject to operating leases, i.e. those leases where substantially all of the risks and rewards of ownership are not transferred to the lessee through the lease, are not recognised in the Statement of Financial Position. The operating lease expense is recognised over the course of the lease arrangement,

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date; namely whether fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

#### MEASUREMENT

Assets subject to a finance lease, as recognised in the Statement of Financial Position, are measured (at initial recognition) at the lower of the fair value of the assets and the present value of the future minimum lease payments. Subsequent to initial recognition these capitalised assets are depreciated over the contract term.

The finance lease liability recognised at initial recognition is measured at the present value of the future minimum lease payments. Subsequent to initial recognition this liability is carried at amortised cost, with the lease payments being set off against the capital and accrued interest. The allocation of the lease payments between the capital and interest portion of the liability is effected through the application of the effective interest method.

The finance charges resulting from the finance lease are expensed, through the Statement of Financial Performance, as they accrue. The finance cost accrual is determined using the effective interest method.

The lease expense recognised for operating leases is charged to the Statement of Financial Performance on a straight-line basis over the term of the relevant lease. To the extent that the straight-lined lease payments differ from the actual lease payments the difference is recognised in the Statement of Financial Position as either lease payments in advance (operating lease asset) or lease payments payable (operating lease liability) as the case may be. This resulting asset and / or liability is measured as the undiscounted difference between the straight-line lease payments and the contractual lease payments.

#### DERECOGNITION

The finance lease liabilities are derecognised when the entity's obligation to settle the liability is extinguished. The assets capitalised under the finance lease are derecognised when the entity no longer expects any economic benefits or service potential to flow from the asset.

The operating lease liability is derecognised when the entity's obligation to settle the liability is extinguished. The operating lease asset is derecognised when the entity no longer anticipates economic benefits to flow from the asset.

#### **MUNICIPALITY AS LESSOR**

#### RECOGNITION

For those leases that meet the definition of a finance lease, where the entity is the lessor, the entity derecognises the asset subject to the lease at the inception of the lease. Along with the derecognition of the asset the entity recognises a finance lease receivable. Finance lease income is allocated to between the finance lease receivable and finance income using the effective interest rate method and the resulting finance income is recognised in the Statement of Financial Performance as it accrues.

For those leases classified as operating leases the asset subject to the lease is not derecognised and no lease receivable is recognised at the inception of the lease. Lease payments received under an operating lease are recognised as income, in the Statement of Financial Performance, in the period that the income accrues.

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date; namely, whether fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

#### MEASUREMENT

Finance lease receivables are recognised at an amount equal to the entity's net investment in the lease. This net investment in the lease is calculated as the sum of the minimum future lease payments and unguaranteed residual value discounted over the lease term at the rate implicit in the lease.

Rental Income from operating leases is recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined lease payments and the contractual lease payments are recognised as either an operating lease asset or operating lease liability. An operating lease liability is raised to the extent that lease payments are received in advance (i.e. the straight-line lease payments are more than the contractual lease payments). The operating lease asset and / or operating lease liability are measured as the undiscounted difference between the straight-line lease receipts and the contractual lease receipts.

#### **DERECOGNITION**

Finance lease receivables are derecognised when the entity's right to the underlying cash flows expire or when the entity no longer expects economic benefits to flow from the finance lease receivable.

Operating lease liabilities are derecognised when the entity's obligation to provide economic benefits or service potential under the lease agreement expires. Operating lease assets are derecognised when the entity's right to the underlying cash flows expire or the entity no longer expects economic benefits to flow from the operating lease asset.

#### 1.15 REVENUE

#### **REVENUE FROM EXCHANGE TRANSACTIONS**

Revenue from exchange transactions refers to revenue that accrues to the entity directly in return for services rendered or goods sold, the value of which approximates the consideration received or receivable, excluding indirect taxes, rebates and discounts

#### RECOGNITION

Revenue from exchange transactions is only recognised once all of the following criteria have been satisfied:

- a) The entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- b) The amount of revenue can be measured reliably; and
- c) It is probable that the economic benefits or service potential associated with the transaction will flow to the entity and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue arising out of situations where the entity acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the entity as compensation for executing the agreed services.

#### MEASUREMENT

Revenue from exchange transactions is measured at the fair value of the consideration received or receivable taking into account the amount of any trade discounts and volume rebates allowed by the entity.

Service charges relating to electricity are based on consumption by consumers as is recorded on each consumer's meter. Meters are read each month and revenue is recognised in the period that invoices are raised. Provisional estimates of consumption are made in periods when meter readings have not been able to be made. The revenue from provisional estimates of consumption is recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. Revenue from the sale of electricity prepaid meter cards are recognised in the period in which cash is received.

Service charges relating to refuse removal are raised and recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements, the category of property usage and the number of refuse containers on each property regardless of whether or not containers are emptied during the month.

Interest revenue is recognised on a time proportion basis.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariff. This includes the issuing of licences and permits.

Revenue for agency services is recognised on a monthly basis once the revenue collected on behalf of agents has been quantified and once the terms of the agency agreement have been complied with.

Revenue from the sale of consumables and sundry items is recognised when the risk is passed to the consumer.

Revenue arising out of situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services.

#### **EXPENDITURE FROM EXCHANGE**

Expenditure arising from exchange-transactions is similar to the policy for exchange revenue.

#### REVENUE FROM NON-EXCHANGE TRANSACTIONS

#### RECOGNITION

Revenue from non-exchange transaction arises when the entity either receives value from another entity without directly giving approximately equal value in exchange or gives value to another entity without directly receiving approximately equal value in exchange.

Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset and there is not a corresponding liability in respect of related conditions.

#### **MEASUREMENT**

An asset that is recognised as a result of a non-exchange transaction is recognised at its fair value at the date of the transfer. Consequently, revenue arising from a non-exchange transaction is measured at the fair value of the asset received, less the amount of any liabilities that are also recognised due to conditions that must still be satisfied.

Where there are conditions attached to a grant, transfer or donation that gave rise to a liability at initial recognition, that liability is transferred to revenue as and when the conditions attached to the grant are met.

Grants without any conditions attached are recognised as revenue in full when the asset is recognised, at an amount equalling the fair value of the asset received.

Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor.

Revenue from assessment rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts have been raised and are legally enforceable. Penalty interest is raised on unpaid rates after the due date for payment and is recognised on a time proportion basis.

Revenue from spot fines and summons are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Donations are recognised when cash is received or when property, plant and equipment are brought into use.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment are brought into use.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

#### **EXPENDITURE RELATING TO NON-EXCHANGE TRANSACTIONS**

Expenditure arising from non-exchange transactions is similar to policy for non-exchange revenue.

#### 1.16 HOUSING DEVELOPMENT FUND

The Housing Development Fund was establised in terms on the Housing Act (Act 107 of 1997)

Sections 15 (5) and 16 of the Housing Act, which came into effect on 1 April 1998, required the Entity to maintain a separate housing operating account. This legislated separate operating account is known as the Housing Development Fund and is fully cash-backed

In terms of section 14(4)(d)(ii)(aa), read with inter alia section 16(2), the Housing Act required that the net proceeds of any letting, sale or alienation of property, previously financed from government hosuing funds, to be paid into a separate operating account, and be utilised by the Entity for housing development in accordance with the National Housing Policy.

#### 1.17 BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets are capitalised to the cost of that asset unless it is inappropriate to do so. The municipality ceases the capitalisation of borrowing costs when substantially all the activities to prepare the asset for its intended use or sale are complete. It is considered inappropriate to capitalise borrowing costs where the link between the funds borrowed and the capital asset acquired cannot be adequately established. Borrowing costs incurred other than on qualifying assets are recognised as an expense in surplus or deficit when incurred.

#### 1.18 RETIREMENT BENEFITS

#### SHORT TERM EMPLOYEE BENEFITS

Short term employee benefits encompasses all those benefits that become payable in the short term, i.e. within a financial year or within 12 months after the financial year. Therefore, short term employee benefits include remuneration, compensated absences and bonuses.

Short term employee benefits are recognised in the Statement of Financial Performance as services are rendered, except for non-accumulating benefits, which are recognised when the specific event occurs. These short term employee benefits are measured at their undiscounted costs in the period the employee renders the related service or the specific event occurs.

#### 1.19 POST-EMPLOYMENT BENEFITS

The Municipality operates various pension schemes. These schemes are funded through trustee administered funds. The Municipality has both defined benefit and defined contribution plans.

#### **DEFINED CONTRIBUTION PLANS**

A defined contribution plan is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

The municipality's contributions to the defined contribution funds are established in terms of the rules governing those plans. Contributions are recognised in the Statement of Financial Performance in the period in which the service is rendered by the relevant employees. The municipality has no further payment obligations once the contributions have been paid.

For defined contribution plans, the Municipality pays contributions to fund administrators. The Municipality has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

#### **DEFINED BENEFIT PLANS**

A defined benefit plan is a post- employment benefit plan other than a defined contribution plan. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable. Natal Joint Superannuation & Retirement Funds are defined benefit funds. The Natal Joint Provident Fund is a defined contribution funds

The schemes are funded through payments to fund administrator or trustee-administered funds, determined by periodic actuarial calculations. The Municipality has both defined benefit and defined contribution plans.

Defined benefit plans have been accounted for as defined contribution plans in accordance with the requirements on multiemployer plans where sufficient information is not available to account for such plans as defined benefit plans. As the fund administrators do not have sufficient information available to allocate the shortfall on liabilities to individual employers, no liability is recognised for any shortfall of fund asset as compared to fund liabilities. Any surcharges that may be levied by the fund from time to time in order to compensate for shortfalls, are recognised as expenses in the period in which they become payable to the fund. As surcharges are advised long in advance, based on actuarial valuations of the fund as a whole, the necessary provision for the payment thereof is made in the course of the municipality's normal budgeting processes.

#### POST RE-TIREMENT HEALTH CARE BENEFITS

The liability recognised in the Statement of Financial Position is in respect of defined benefit plan for post employment health care benefits. The fund is actuarially valued each year using the discounted cash flow method. Any deficits identified by the actuary are recovered from the municipality in the form of surcharges added to the contributions which are recognised as an expense in the Statement of Financial Performance in the year that they become payable. Valuations of these obligations are carried out every year by independent qualified actuaries.

#### 1.20 IMPAIRMENT OF NON-FINANCIAL ASSETS

#### RECOGNITION

The entity assesses at each reporting date whether there is an indication that an asset may be impaired. Where the carrying amount of an asset exceeds its recoverable amount (or recoverable service amount in the case of non-cash-generating assets), the asset is considered impaired and is written down to its recoverable amount (or recoverable service amount.

#### **MEASUREMENT**

An asset's recoverable amount (or recoverable service amount) is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value-in-use. This recoverable amount (or recoverable service amount) is determined for individual assets, unless those individual assets are part of a larger cash generating unit, in which case the recoverable amount (or recoverable service amount) is determined for the whole cash generating unit.

An asset is part of a cash generating unit where that asset does not generate cash inflows that are largely independent of those from other assets or group of assets.

In determining the recoverable amount (or recoverable service amount) of an asset the entity evaluates the assets to determine whether the assets are cash generating assets or non-cash generating assets.

For cash generating assets the value in use is determined as a function of the discounted future cash flows from the asset. In assessing value-in-use for cash-generating assets, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, other fair value indicators are used.

Where the asset is a non-cash generating asset the value in use is determined through depreciated replacement cost, restoration cost approach or service units approach. The decision to the approach to use is dependent on the nature of the identified impairment.

Impairment losses of continuing operations are recognised in the Statement of Financial Performance in those expense categories consistent with the function of the impaired asset.

#### REVERSAL OF IMPAIRMENT

A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Financial Performance unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase.

#### IMPAIRMENT OF SPECIFIC NON-FINANCIAL ASSETS

#### PROPERTY, PLANT AND EQUIPMENT

Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

Where items of property, plant and equipment have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the Statement of Financial Performance in the period that the impairment is identified.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of the impairment is recognised in the Statement of Financial Performance.

#### **INTANGIBLE ASSETS**

The entity tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is performed at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

Irrespective of whether there is any indication of impairment, the municipality also tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

#### **INVESTMENT PROPERTY HELD AT COST**

The entity tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an Investment Property is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the Statement of Financial Performance.

#### 1.21 RELATED PARTIES

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality. Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed. The municipality applies GRAP 20 for related parties.

#### 1.22 VALUE ADDED TAX (VAT)

The municipality accounts for VAT on the accrual basis.

Based on approval received from the Commissioner for South African Revenue Services, the municipality has been given permission to remit or claim for VAT on the payments basis for debtors and creditors.

#### 1.23 SERVICE CONCESSION ARRANGEMENT

Service concession arrangement is a contractual arrangement between a grantor and the operator in which an operator uses the service concession asset to provide a mandated function on behalf of a grantor for a specified period. Where the operator is compensated for its services over the period of service concession arrangement. A grantor is the entity that grants the right to use the service concession asset to the operator.

A mandated function involves the delivery of a public service by an operator on behalf of a grantor that falls within the grantor's mandate. An operator is the entity that uses the service concession asset to provide a mandated function subject to the grantor's control of the asset.

#### RECOGNITION

The entity recognises an asset provided by the operator and an upgrade to an exisiting asset of the entity, as a service concession asset if the entity controls or regulates what services the operator must provide with the asset, to whom it must provide them, and at what price, and if the entity controls (through ownership, beneficial entitlement or otherwise) any significant residual interest in the asset at the end of the term of the arrangement. This applies to an asset used in a service concession arrangement for its entire economic life.

After initial recognition or reclassification, service concession assets are clearly identified from other assets within the same asset category, and are clearly identified from owned and/or leased assets.

Where the entity recognises a service concession asset, and the asset is not an exisiting asset of the entity (grantor), the entity (grantor) also recognises a liability. The entity does not recognise a liability where an exisiting asset of the entity is reclassified as a service concession asset, except in circumstances where additional consideration is provided by the operator.

#### **MEASUREMENT**

The entity initially measures the service concession asset at its fair value where the asset is not an exisiting asset of the entity. Where the asset is an exisiting asset of the entity and it meets the recognition criteria of a service concession asset, the asset is reclassified as a service concession asset, and the asset is accounted for in accordance with the policy on Investment Property, Property plant and equipment, Intangible assets, or Heritage assets as appropriate.

The entity initally measures the liability at the same amount as the service concession asset, adjusted by the amount of any other consideration from the entity to the operatir, or from the operator to the entity,

#### Financial liability model

Where the entity has an unconditional obligation to pay cash or another financial asset to the operator for the construction, development, acquisition, or upgrade of a service concession asset, the entity accounts for the liability as a financial liability. The entity allocates the payments to the operator and accounts for them according to their substance as a reduction in the liability recognised, a finance charge, and charges for services provided by the operator.

The finance charge and charges for services provided by the operator in a service concession arrangement are accounted for as expenses.

Where the asset and service components of a service concession arrangement are separately identifiable, the service components of payments from the entity to the operator are allocated by reference to the relative fair values of the service concession asset and the services.

Where the asset and service components are not separately identifiable, the service component of payments from the entity to the operator is determined using estimation techniques.

#### Grant of a right to the operator model

Where the entity does not have an unconditional obligation to pay cash or another financial asset to the operator for the construction, development, acquisition, or upgrade of a service concession asset, and grants the operator the right to earn revenue from third-party users or another revenue-generating asset, the entity accounts for the liability as the unearned portion of the revenue arising from the exchange of assets between the entity and the operator.

The entity recognises revenue and reduces the liability according to the substance of the service concession arrangement.

#### Dividing the arrangement

If the entity pays for the construction, development, acquisition, or upgrade of a service concession asset partly by incurring a financial liability and partly by the grant of a right to the operator, it accounts separately for each part of the total liability.

#### Other liabilities, contingent liabilities and contingent assets

The entity accounts for other liabilities, contingent liabilities, and contingent assets arising from a service concession arrangement in accordance with the policy on Provisions, Contingent liabilities and contingent assets and Financial instruments.

#### Other revenues

The entity accounts for revenues from a service concession arrangement, other than those relating to the grant of a right to the operator model, in accordance with the Standard of GRAP on Revenue from exchange transactions.

### Recognition of the performance obligation and the right to receive a significant interest in a service concession asset

If the entity controls a significant residual interest in a service concession asset at the end of the service concession arrangement through ownership, beneficial entitlement or otherwise, and the arrangement does not constitute a finance or an operating lease, the entity recognises its right to receive the residual interest (i.e. a receivable) in the service concession asset at the commencement of the arrangement.

The right to receive a residual interest in the service concession asset to be received at the end of the arrangement, is an exchange consideration. This is because the entity will receive an asset in exchange for granting the operator access to the asset while providing a mandated function on its behalf in accordance with the substance of the arrangement.

In terms of the policy on Revenue from exchange transactions, the exchange consideration are recognised and measured at fair value. The value of the receivable (the right to the residual interest in the asset), receivable at the end of the service concession arrangement, reflects the value of the service concession asset as if it were already in the age and in the condition expected at the end of the service concession arrangement.

When the entity recognises the right to receive a residual interest in the service concession asset, it also recognises its performance obligation for granting the operator access to the service concession asset in accordance with the substance of the arrangement. The value of the performance obligation is the same as the receivable interest recognised at the commencement of the service concession arrangement.

The performance obligation is reduced and revenue is recognised based on the substance of the arrangement. Where service concession arrangements include provisions to adjust the arrangement for changes, the effect of such changes is deemed to have taken place at the inception of the service concession arrangements

The municipality has assessed the transactions and for the period under assessment does not have any such arrangements.

#### 1.24 ACCOUNTING BY PRINCIPALS AND AGENTS

#### IDENTIFICATION

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

#### Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether an municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

#### Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent

#### Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.

It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

#### RECOGNITION

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP. The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP. The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

#### 1.25 CAPITAL COMMITMENTS

A capital commitment is a binding agreement to undertake capital expenditure at some time in the future which has not yet become an actual liability

|   |  | Note | 2020                        | 2019                     |

#### Notes to The Annual Financial Statements

for the year ended 30 June 2020

|  | Note | 2020       | 2019       |
|--|------|------------|------------|
| Property rates impaired  |      | R          | R          |
| As of 30 June 2020, property rates of R 59 085 731 (2019 R 56 008 112) were impaired and provided for. |      |            |            |
| The ageing of these receivables is as follows:   |      |            |            |
| 3 to 4 months  |      | 2 855 924  | 3 183 857  |
| Over 4 months  |      | 41 920 390 | 49 319 246 |
| The fair value of property rates approximates their carrying amounts.                                  |      |            |            |

#### Statutory receivables general information

#### Transaction(s) arising from statute

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means and are settled in cash or another financial asset. The municipality accounts for statutory receivables which arise from the implementation of:

The Municipal Property Rates Act 6 of 2004 (MPRA) whose purpose is to regulate the power if a municipality to impose rates on property, to exclude certain properties from rating in the national interest and to make provision for municipalities to implement a transparent and fair system of exemptions, reductions and rebates through their rating policies.

The National Road Traffic Act 93 of 1996 (NRTA) whose purpose is to provide for road traffic matters which shall apply uniformity throughout the republic and for matters connected therewith.

#### **Determination of transaction amount**

Transaction amounts for these statutory are determined as follows:

Property rates - billed amount with reference to property values taking into consideration any exemptions, rebates and reductions as per policy, excluding any

Traffic fines - with reference to the schedules as per the act and offence.

#### Penalties and other charges levied/charged

Penalties on outstanding balances is charged on overdue property rates balances and form part of statutory receivables at 1% per month on the outstanding balance excluding penalties.

#### Basis used to assess the test whether a statutory receivables is impaired

All balances outstanding is assessed at reporting date whether there is an indication that a statutory receivable or a group of statutory receivables may be impaired.

|   | The investment property values are based on the valuation roll. The fixed date of the revaluations was 1 July 2016. Valuations were performed by an independent valuer, Mr P Carl Jacobs, Professional Valuer, Registration number 5375, of Umhlaba Geomatics Incorporated of Dundee. The valuer is not connected to the municipality and have recent experience in the location and category of the investment property being valued. The value was based on open market value. |                       |                                 |

|    |   | 10 853 531             | 8 663 924              |
|    | The provision for rehabilitation of landfill sites relates to the legal obligation to rehabilitate landfill sites used for waste disposal. It is calculated as the present value of the future obligation, discounted at 7.25%, over an average period of 2.84 years. |                        |                        |
|    | The provision created for the rehabilitation of the landfill site is based on<br>Anderson Vogt Consulting Engineers assessment of the rehabilitation costs of<br>the Glencoe dumpsite. A study will be done to determine the cost estimate in the<br>near furture     |                        |                        |
|    | The provision is calculated in line with the consulting engineers assessment as determined by discounting the present value of the estimate. The estimate excludes VAT. Council intends to commence spending against the provision in 2.84 years.                     |                        |                        |

| Endumeni Municipality as an Agent for Eskom (INEP)  |              |               |
| The municipality entered into an arrangement with Eskom whereby the municipality acts as Eskom's agent. The municipality manages the construction of electrical infrastructure in areas not covered by Endumeni's licence. The municipality received the INEP allocation, accepts invoices for work done from service providers and manages the payment process on behalf of Eskom and hands over the infrastructure upon completion. A reconciliation of the funds received and paid and any outstanding balances are disclosed below. |              |               |

#### 34 CHANGE IN ACCOUNTING POLICY

33

Adjustments were made to amounts previously reported in the annual financial statements of the municipality arising from a change in accounting policy. Land previously recorded as a municipal asset was credited to Accumulated Surplus/(Deficit) after the implementation of IGRAP 18 (see note 35). Properties were sold but took time to be registered into rightfull owners name.

#### Property, plant and equipment

 Balance previously reported
 309 475 668

 Implementation of IGRAP 18
 ( 823 314)

 Total
 - 308 652 354

#### 35 PRIOR PERIOD ERROR

#### **ACCOUNTS PAYABLE**

#### Creditor invoices received after cut off of creditors

During the year invoices were submitted for payment after the cut-off off creditors for the 2018/2019 financial year. The amounts were cumulatively material in amount. An adjustment was made to the Trade Payables and the expenditure items to correct this error.

The effect of the the correction of the abovementmentioned prior period errors are reflected below:

| Creditor invoices identified after year end   | ( 16 940 305)<br>( 1 041 389) |
|---|-------------------------------|
| Net effect on Statement of Financial Position | ( 17 981 694)                 |

#### **SUNDRY CREDITORS**

#### Creditor balances that do not meet the definition of a liability

During the financial year, management performed a review of the creditors balances. It was noted that some balances were on the municipal books as creditors from 2013 or earlier with no movements. No correpondence was received from third parties claiming these monies and it is uncertain who these monies are due and payable to. These amounts were removed from Sundry creditors and reversed against the accumulated surpluses.

The effect of the the correction of this prior period error is reflected below:

| Balance previously reported 30 June 2018           | ( 3 725 079) |
|--|--------------|
| Sundry creditors reversed to accumulated surpluses | 1 556 767    |
| Net effect on Statement of Financial Position      | ( 2 168 312) |

#### INVESTMENT PROPERTY

#### Investment property transferred in the prior year

During the financial year, it was noted that a few properties were registered and transferred in the previous financial year but still appeared in the valuation roll from the previous year. An adjustment was therefore necessary to correct the error on investment property.

#### Balance previously reported 30 June 2018 Investment property transferred

56 937 000 (1 115 000)

#### 44 EVENTS AFTER THE REPORTING DATE

No events after the reporting date noted to warrant disclosure. Measures to deals with the impact of Covid-19 are disclosed below.

#### **COVID-19 Exposure**

Since the emergence of the Corona virus (COVID-19) in December 2019 and its subsequent spread throughout the world, many local communities have been severely impacted. In South Africa, the government placed the country under lock down with effect from March 2020 as part of the measures to contain the further spread of the virus in the country. Some businesses required to cease or limit operations for long periods of time. Measure taken to contain the spread of the virus include travel bans, quarantines, social distancing and closures of non-essential services have triggered significant disruptions to businesses resulting in an economic slowdown.

The measures that were taken resulted in some losses which in turn affected the municipality's ability to collect revenue from consumers. In an effort to assist the community the municipality has put in place certain debt incentives. National government gazetted a special budget in which additional equitable share has been allocated to the municipality in the 2021 financial year. Some of these funds will be set aside to assist the ratepayers.

It is uncertain when all the measure to contain the virus will be lifted , however the municipality will continue working with stakeholders in order to continue with service delivery whilst also ensuring the financial sustainability of the municipality

#### 45 RISK MANAGEMENT

#### Maximum credit risk exposure

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

The municipality does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes. Financial assets exposed to credit risk at year end were as follows:

Except as detailed below, the carrying amount of financial assets recorded in the Annual Financial Statements, which is net of impairment losses, represents the municipality's maximum exposure to credit risk without taking account of the value of any collateral obtained:

| Cash and Cash Equivalents Financial guarantees Trade and other receivables             | 34 333 310<br>153 310<br>36 272 536 | 43 181 420<br>153 310<br>24 284 780 |
|--|-------------------------------------|-------------------------------------|
| Maximum Credit Exposure  These balances represent the maximum exposure to credit risk. | 70 759 157                          | 67 619 510                          |

#### Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Gross finance lease obligations Borrowings Trade and other payables Other

Interest rate risk

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk. The municipality does not have any long term borrowings.

#### 46 RESTATEMENT OF COMPARATIVE INFORMATION

During the year it was noted that Overalls and Protective clothing was erronously recorded as employee related costs expenditure instead of operational expenditure. The staff are provided with protective clothing to execute their duties and not as a fringe benefit. As the expenditure it not regarded as a fringe benefit in accordance with MSCOA, an adjustment was made to prior year to reclassify the expenditure from employee related costs to operational expenditure.

Call deposits held were previously classified and disclosed as Investments in the Statement of Financial Position. These call deposits do not meet the definition of Investments as they are short term highly liquid investments, readily convertible into cash with maturities of three months or less. As a result amounts previously classified as Investments were included with Cash at bank and reclassified as Cash and Cash Equivalents on the Statement of Financial Position. The effect of this reclassification is reflected below.
